

Human CND Symbol

What is the best way to make a human peace symbol? How are the people organised? There is no right or wrong answer but some ways are easier than others! What would you do?

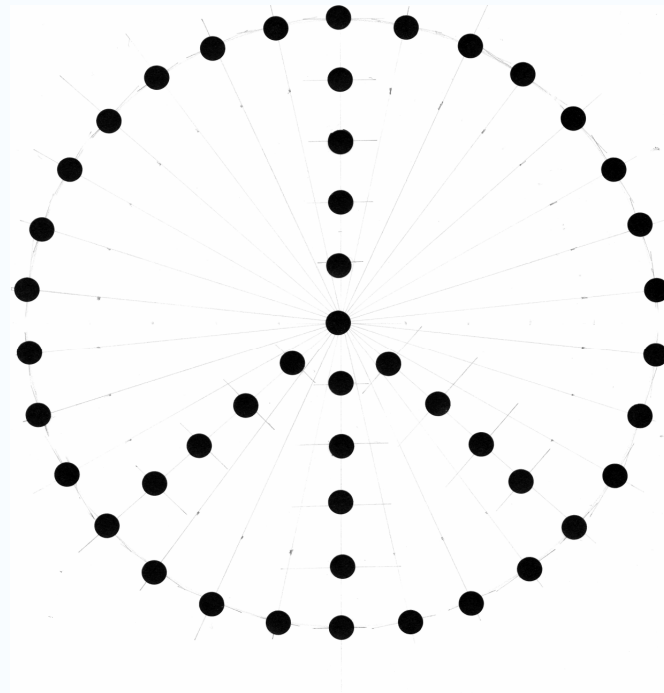

In your group decide how you will make a human peace symbol.

Points to think about:

- 4 radii and the angles
- how much space each person should take up
- minimum number of people needed and how to include more people arriving
- how the finished symbol could be photographed
- find out the history of the CND symbol

Possible solution for making human CND symbol

This is an arrangement for 47 people:

Design an arrangement for a different number of people (some numbers are easier to deal with than others!)

Design

1. The shape is made with a circle, diameter and two radii.
2. The positions should be equally spaced as far as possible.
3. The two radii are at an angle of approximately 45° to the diameter.
4. The diameter, with the two end positions, and the centre position are important.

Making the symbol

1. Choose the centre spot (important – this person could hold a flag)
2. Chalk lines 
3. People making the circle hold hands and walk backwards facing the centre. People for the diameter and radii stand on chalk lines
4. The positions should be equally spaced.
